SYLLABUS AND SAMPLE PAPER

# Aptitude Test

For admission to Class 11

| 30 | 30 | 3 hours |
|---|---|---|
| questions | minutes | link stays open |

## About the test

- 30 questions in 30 minutes: 10 each of maths, English and science, mixed together.
- Half the maths and science questions are from the Class 10 syllabus (the chapters listed below); the rest test reasoning. Each question is marked Basics or Class 10.
- Taken online on a phone or computer, through a link sent to the parent's WhatsApp. The link works for 3 hours.
- Most questions have four options; a few ask for a number to be typed in.
- One mark for a correct answer. A quarter mark off for a wrong multiple-choice answer; nothing off for a wrong type-in answer or a blank.
- Answers can be changed before submitting. If the candidate leaves the page, the timer pauses.

## What the test covers: basics

Basics questions test reasoning, not memory, on these topics.

### Maths

1. Number patterns and series
2. Primes, factors, HCF and LCM
3. Fractions
4. Perimeter and area
5. Simple equations
6. Speed, distance and time
7. Averages
8. Ratio and proportion
9. Percentages, profit and loss, interest
10. Squares and cubes
11. Probability

### English

1. Vocabulary
2. Grammar
3. Sentence completion and ordering
4. Reading comprehension

### Science

1. Matter and its changes
2. Acids, bases and salts
3. Force, motion and energy
4. Heat, light and sound
5. Electricity and magnetism
6. Life processes and the environment

### Reasoning

1. Clocks and calendars
2. Number codes and puzzles
3. Everyday units
4. Word problems
5. Time and work
6. Problems on ages
7. Mixtures
8. Venn diagrams
9. Analogies, odd one out, series and codes
10. Reading an experiment
11. Applying a principle to a new situation

## Class 10 syllabus questions

### Maths

1. Real Numbers
2. Polynomials
3. Pair of Linear Equations in Two Variables
4. Quadratic Equations
5. Arithmetic Progressions
6. Triangles
7. Coordinate Geometry
8. Introduction to Trigonometry

### Science

1. Chemical Reactions and Equations
2. Acids, Bases and Salts
3. Life Processes
4. Control and Coordination
5. Light – Reflection and Refraction
6. Electricity

## Sample paper

These questions were written for this sheet. The real test has different questions, in the same style and at a similar level.

1 MATHS BASICS

Which of these numbers is divisible by both 3 and 4?

(A) 132
(B) 138
(C) 142
(D) 150

2 ENGLISH BASICS

The sentries stayed vigilant all night. As used here, "vigilant" most nearly means

(A) tired
(B) watchful
(C) silent
(D) brave

3 SCIENCE BASICS

A 1,000 W room heater is switched on for 3 hours. How many units (kilowatt-hours) of electricity does it use?

Type-in answer:

4 MATHS CLASS 10

What is the HCF of 24 and 36?

(A) 6
(B) 72
(C) 4
(D) 12

5 ENGLISH BASICS

Choose the correct word: The cadets were proud ___ their achievement.

(A) of
(B) for
(C) with
(D) at

6 SCIENCE CLASS 10

Which gas is given off when zinc reacts with dilute hydrochloric acid?

(A) Oxygen
(B) Hydrogen
(C) Carbon dioxide
(D) Chlorine

7 MATHS BASICS

Kiran scored 54 marks out of 75 in a test. What percentage did Kiran score?

Type-in answer:

8 ENGLISH BASICS

Which word is the odd one out?

(A) Cricket
(B) Hockey
(C) Football
(D) Chess

9 SCIENCE BASICS

A fuse is fitted in a household circuit so that, if too much current flows, it

(A) raises the voltage to appliances
(B) melts and breaks the circuit
(C) stores the extra electricity
(D) makes the bulbs glow brighter

10 MATHS CLASS 10

What is the 15th term of the arithmetic progression 5, 8, 11, ...?

Type-in answer:

11 ENGLISH BASICS

Choose the word most nearly opposite in meaning to "humble".

(A) proud
(B) kind
(C) quiet
(D) poor

12 SCIENCE CLASS 10

Which blood vessels carry blood away from the heart to the rest of the body?

(A) Arteries
(B) Veins
(C) Capillaries
(D) Nerves

13 MATHS BASICS

A bus leaves at 9:40 am and travels 150 km at a steady 60 km/h. At what time does it arrive?

(A) 11:40 am
(B) 11:50 am
(C) 12:10 pm
(D) 12:30 pm

14 ENGLISH BASICS

Choose the correct words: She ___ in this school since 2022.

(A) studies
(B) is studying
(C) has studied
(D) studied

15 SCIENCE BASICS

Which of these is a compound?

(A) water
(B) oxygen
(C) iron
(D) air

16 MATHS CLASS 10

What is the value of tan 45°?

(A) 0
(B) 1
(C) 1/√2
(D) √3

17 ENGLISH BASICS

To "burn the midnight oil" means to

(A) spend money carelessly
(B) work late into the night
(C) light a lamp at midnight
(D) forget an important task

18 SCIENCE CLASS 10

A 10 Ω resistor is connected across a 5 V battery. What current flows through it, in amperes?

Type-in answer:

19 MATHS BASICS

After a 25% increase, a salary is ₹20,000 a month. What was it before the increase?

(A) ₹15,000
(B) ₹16,000
(C) ₹16,500
(D) ₹17,500

20 ENGLISH BASICS

If COLD is written as DPME in a code, how is WARM written in the same code?

(A) VZQL
(B) XBSM
(C) XBSN
(D) YCTO

21 SCIENCE BASICS

A 60 W bulb and a 1,500 W heater are each used for 2 hours. How many times more energy does the heater use?

(A) 2.5 times
(B) 12.5 times
(C) 25 times
(D) 50 times

22 MATHS CLASS 10

What are the roots of the equation $x^2 - 5x + 6 = 0$?

(A) 2 and 3
(B) −2 and −3
(C) 1 and 6
(D) −1 and 6

23 ENGLISH BASICS

"Carry a water bottle on the march; there are no taps on the route." This advice assumes that

(A) the marchers will need water
(B) taps on routes are often dirty
(C) the march will be a short one
(D) water bottles are not costly

24 SCIENCE CLASS 10

A ray of light travels at an angle from air into glass. At the surface, the ray bends

(A) away from the normal
(B) along the surface
(C) towards the normal
(D) back into the air

25 MATHS BASICS

Two fair dice are thrown together. What is the probability that the two numbers add up to 8?

(A) 1/6
(B) 1/9
(C) 7/36
(D) 5/36

26 ENGLISH BASICS

The two teams were so close that the match went to a tie-breaker. As used here, "close" most nearly means

(A) near each other
(B) friendly
(C) shut
(D) evenly matched

27 SCIENCE BASICS

A wooden block floats in water with exactly half of its volume under the surface. Water has a density of 1 g/cm³. What is the density of the wood?

(A) 1 g/cm³
(B) 2 g/cm³
(C) 0.25 g/cm³
(D) 0.5 g/cm³

28 MATHS CLASS 10

The point (5, 4) lies exactly halfway between (2, a) and (b, 6). Find a + b.

Type-in answer:

29 ENGLISH BASICS

The rescue was ___, but the team's ___ meant that nobody was hurt.

(A) easy ... carelessness
(B) quick ... delay
(C) dangerous ... caution
(D) simple ... confusion

30 SCIENCE CLASS 10

Three 6 Ω resistors are connected in parallel across a 12 V battery. What total current is drawn, in amperes?

Type-in answer:

## Answers

| # | ANSWER | WORKING |
|---|---|---|
| 1 | A. 132 | 132 = 12 × 11, so it is divisible by both. 138 and 150 are divisible by 3 but not by 4; 142 is divisible by neither. |
| 2 | B. watchful | Vigilant means keeping careful watch for danger, which is exactly what a sentry does. Tired or silent sentries may still be vigilant. |
| 3 | 3 | 1,000 W is 1 kW, and energy is power × time: 1 kW × 3 h = 3 kWh, which is 3 units. This is a type-in question. |
| 4 | D. 12 | $24 = 2^3 \times 3$ and $36 = 2^2 \times 3^2$. The HCF takes the lowest power of each common prime: $2^2 \times 3 = 12$. 72 is the LCM. |
| 5 | A. of | "Proud" is followed by "of": proud of something. The other prepositions are not used with proud in this sense. |
| 6 | B. Hydrogen | A metal and a dilute acid give a salt and hydrogen: zinc chloride and hydrogen here. Carbon dioxide comes from acids with carbonates. |
| 7 | 72 | 54 ÷ 75 = 0.72, which is 72%. Another way: 75 marks is 100%, so each mark is 4/3 %, and 54 × 4/3 = 72. This is a type-in question. |
| 8 | D. Chess | Cricket, hockey and football are outdoor team games played with a ball. Chess is a board game for two players. |
| 9 | B. melts and breaks the circuit | A fuse wire melts when the current is too large, which breaks the circuit and stops the flow before wires overheat or catch fire. |
| 10 | 47 | a = 5 and d = 3, so the 15th term is a + 14d = 5 + 42 = 47. This is a type-in question: the answer is typed as a number. |
| 11 | A. proud | Humble means modest, not thinking oneself important, so the opposite is proud. A humble person may also be kind or quiet, but those are not opposites. |
| 12 | A. Arteries | Arteries carry blood away from the heart under high pressure; veins bring it back. Capillaries link the two, and nerves carry signals, not blood. |
| 13 | C. 12:10 pm | The journey takes 150 ÷ 60 = 2.5 hours, which is 2 hours 30 minutes. 9:40 am plus 2 hours 30 minutes is 12:10 pm. |
| 14 | C. has studied | "Since 2022" marks an action that began in the past and continues now, which takes the present perfect: "has studied". The simple present and past do not fit "since". |
| 15 | A. water | Water is hydrogen and oxygen chemically joined, so it is a compound. Oxygen and iron are elements, and air is a mixture. |
| 16 | B. 1 | In a right triangle with a 45° angle the two shorter sides are equal, so tan 45° = opposite ÷ adjacent = 1. $1/\sqrt{2}$ is sin 45° or cos 45°. |
| 17 | B. work late into the night | The idiom comes from working by lamplight after midnight: it means staying up late to work or study. Lighting the lamp is the picture, not the meaning. |
| 18 | 0.5 | By Ohm's law I = V ÷ R = 5 V ÷ 10 Ω = 0.5 A. This is a type-in question: the answer is typed as a number. |

| # | ANSWER | WORKING |
|---|---|---|
| 19 | **B. ₹16,000** | The new salary is 125% of the old one, so the old salary is 20,000 ÷ 1.25 = ₹16,000. Taking 25% off ₹20,000 gives the wrong ₹15,000. |
| 20 | **C. XBSN** | Each letter moves one step forward: C→D, O→P, L→M, D→E. So W→X, A→B, R→S, M→N, giving XBSN. |
| 21 | **C. 25 times** | Both run for the same time, so energy goes up with power alone: 1,500 ÷ 60 = 25. The 2 hours cancels out. |
| 22 | **A. 2 and 3** | $x^2 - 5x + 6 = (x - 2)(x - 3)$, so the roots are 2 and 3. 1 and 6 multiply to 6 but add to 7, not 5. |
| 23 | **A. the marchers will need water** | The advice only makes sense if the marchers will need water along the way. The other statements are not needed for it to hold. |
| 24 | **C. towards the normal** | Light slows down in glass, a denser medium, so it bends towards the normal. Going from glass into air it bends away from the normal. |
| 25 | **D. 5/36** | There are 36 equally likely outcomes. A total of 8 comes from (2,6), (3,5), (4,4), (5,3) and (6,2), which is 5 outcomes: 5/36. |
| 26 | **D. evenly matched** | A match that needs a tie-breaker was between teams of nearly equal strength, so "close" means evenly matched. "Near each other" is the everyday sense of the word, the trap here. |
| 27 | **D. 0.5 g/cm³** | A floating block pushes aside its own weight of water. It does so with half its volume, so it weighs as much as half its volume of water: 0.5 g/cm³. |
| 28 | **10** | Midpoint x: (2 + b)/2 = 5, so b = 8. Midpoint y: (a + 6)/2 = 4, so a = 2. Then a + b = 10. This is a type-in question. |
| 29 | **C. dangerous ... caution** | "But" sets up a contrast: a risky rescue, yet nobody hurt, thanks to something good the team did. Only "dangerous ... caution" gives that; the other second words would cause harm, not prevent it. |
| 30 | **6** | In parallel 1/R = 3 × 1/6 = 1/2, so R = 2 Ω and I = 12 V ÷ 2 Ω = 6 A. Treating them in series (18 Ω) gives 0.67 A. |
